

TecFi AI

*“The meme coin that governs itself — because **TECFI** thinks before it moons.”*

Ticker: \$TECFI

Blockchain: Ethereum (ERC-20)

Total Supply: 1,500,000 (Fixed, No Minting, No Burning)

Overview

TecFi AI is more than a meme — it’s a fully AI-governed, decentralized token that combines **DeFi mechanics**, **DAO governance**, and **meme-worthy virality**. This is a token designed for holders who want fun *and* functionality.

From staking rewards to off-chain AI proposal validation, **TECFI** is the first token to put **intelligence behind the hype**.

Narrative & Vision

“Not Just Another Meme Coin”

TECFI is the first of its kind — an *AI-co-governed memecoin* on Ethereum. It merges the best of **Web3 utility**, **community DAO engagement**, and the viral potential of **meme culture**.

What Makes TECFI Unique:

- 🧠 Smart governance with real AI logic
 - 👥 Community-powered decision – proposals
 - 💎 Fixed supply and no artificial inflation
 - 🏠 Serious staking rewards for diamond hands
 - 🔥 Limited Supply
-

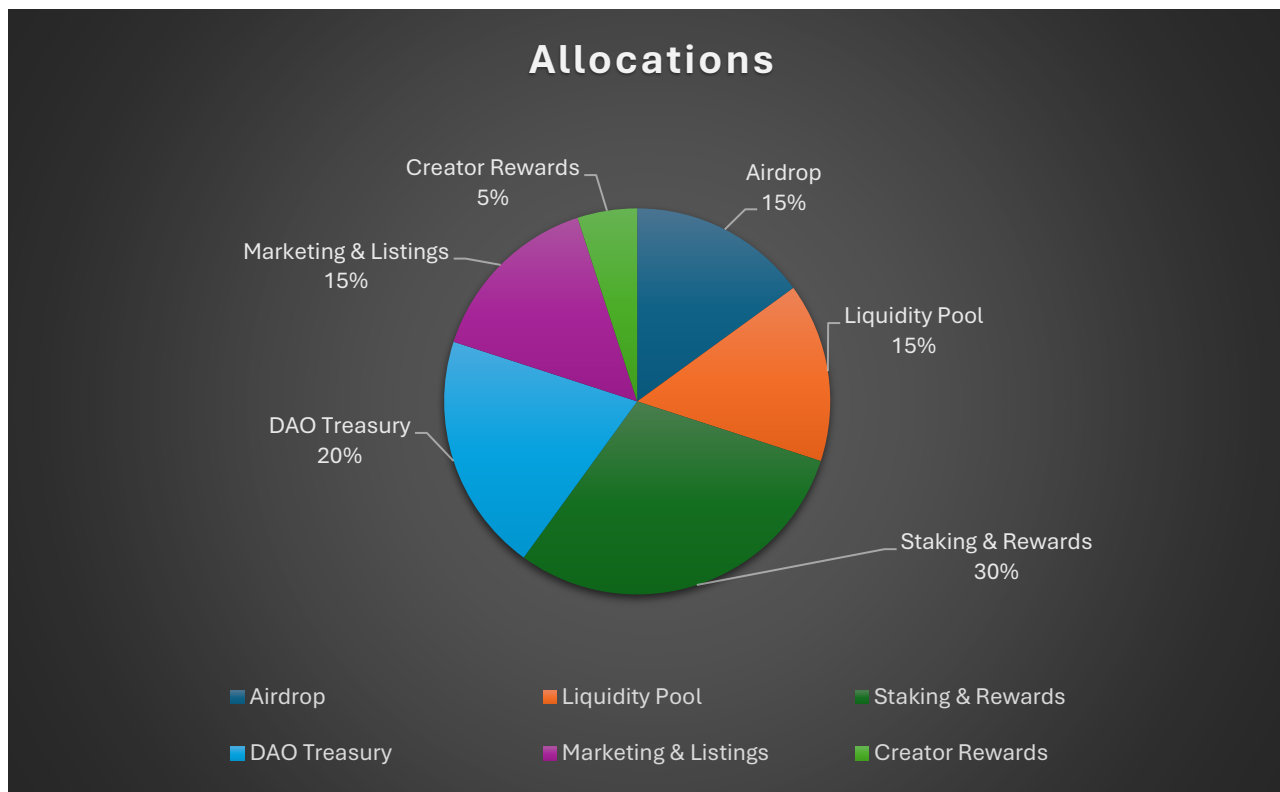

Tokenomics

Supply Info

- **Total Supply:** 1,500,000 TECFI
- **Minting:** Disabled

Rewarding both community engagement and early believers — because memes don’t spread themselves.

AI-Powered Governance

Welcome to the future of DAO. TECFI’s community doesn’t just vote — they co-govern with AI. Governance flow is as follows:

-  1 **Proposal Created** – Token holder with ≥ 250 TECFI submits a proposal.
-  2 **Voting Opens** – Snapshot voting by holders.
-  3 **Quorum Reached** – At least 4% of total supply participates.
-  4 **AI Evaluates** – Proposal is submitted to AI GPT model.
-  5 **Decision Posted** – Dashboard shows approval/rejection + reasoning.

Built-in intelligence avoids spam proposals and meme overload. AI helps steer TECFI toward meaningful, memetic growth.
