Brainzy AI

"Governed by Intelligence. Fueled by Community."

Ticker: \$BRANI **Blockchain:** Ethereum (ERC-20)

Total Supply: 500,000,000 BRANI (Fixed, No Minting, No Burning)

Overview

Brainzy AI is the next-generation token that combines AI governance, powerful DeFi mechanics, and transparent DAO control — all wrapped in an ecosystem built for intelligent decision-making and long-term sustainability.

BRANI isn't just a utility token — it's the core of a decentralized intelligence economy. From staking and rewards to proposal evaluation, Brainzy AI empowers holders to shape the project's future.

Narrative & Vision

"AI-Governed. DAO Powered. 50% Rewards."

Brainzy AI reimagines what community-led projects can be. This isn't just another governance token — it's a fully operational AI-assisted DeFi system with utility, transparency, and a locked-in supply.

What Makes BRANI Unique:

• AI-Governance

Unlike traditional DAOs, Brainzy AI uses **off-chain proposal creation**, **voting on proposals**, and **AI proposal evaluation** to streamline decisions.

Governance Flow:

- 1. Token holders create governance proposals via BRANI dApp (www.brainzyai.com).
- 2. Token holders vote on which proposals to submit for decision.
- **4.** All evaluates in accordance with a "token holder best interests" algorithm.
- 5. Final decision AND reasoning posted to dApp dashboard under "History Log."
- **6.** Transparent token allocations.

*ALL PROPOSALS, VOTING OUTCOMES, AND DECISIONS ARE VERIFIABLE THROUGH SUPABASE FOR COMPLETE TRANSPARENCY.
